

How to take the online lessons:

- 1.) Get a good webcam with as little audio latency as possible (Logitech is best)
- 2.) Computer must be audio and video quality (2-3ghz machines are best)
- 3.) Get a good FLATBED usb scanner (so you can scan your work and email it to me)
- 4.) You need a good printer (Laser or Inkjet that can do graphics no problem)
- 5.) A working email account
- 6.) A working Youtube or Dailymotion account (create one if you don't have one)
- 7.) An external storage drive – (Microsoft Skydrive or Adrive.com are good)
- 8.) You will need to allow me access to upload files to your external drive. I can upload some files Thru regular email as they are too large for most email accounts so you need a free online drive And you need to give me access (password).
- 9.) You need a good hardware real metronome or drum machine. Online software metronomes Are good and they are also free.

Step 1.)

Write down ALL the scale you know in all the positions you know and email them to me
Write down ALL the chords you know in all the positions you know and email them to me.

Step 2.)

Webcam yourself playing the scales, saying the name of each scale OUT LOUD as you play it.
Webcam yourself playing the chords, saying the name of each chord out loud as you play it.
Upload the videos to your YouTube or DailyMotion account and email me the link.

I can then see where you are at and design a workable lesson plan for you.

Good Luck!
